

PULSE SPLITTER - TECHNICAL INFORMATION & INSTALLATION INSTRUCTIONS

Waterguard

DIN rail application includes:

- The Waterguard water meter pulse splitter, where the output from a water meter is shared with another device, (Building Management System, BMS)
- The Waterguard 12VDC power supply for one or more pulse splitters and or other devices requiring 12VDC 1 Amp supply

Input signal pulse splitter where the output pulse from a water meter is shared with a BMS or other building monitoring device. Operating power supplied is 12VDC which can also be used to power the Series 7 controller or any other device with the same output.

These pulse splitters are also available with a 12VDC plug in power supply. In this instance wire the plug in power supply to the 12VDC supply input on the pulse splitter.

These instructions should be used in conjunction with the Waterguard Series 7 Installation Guide.
